OUR STORY

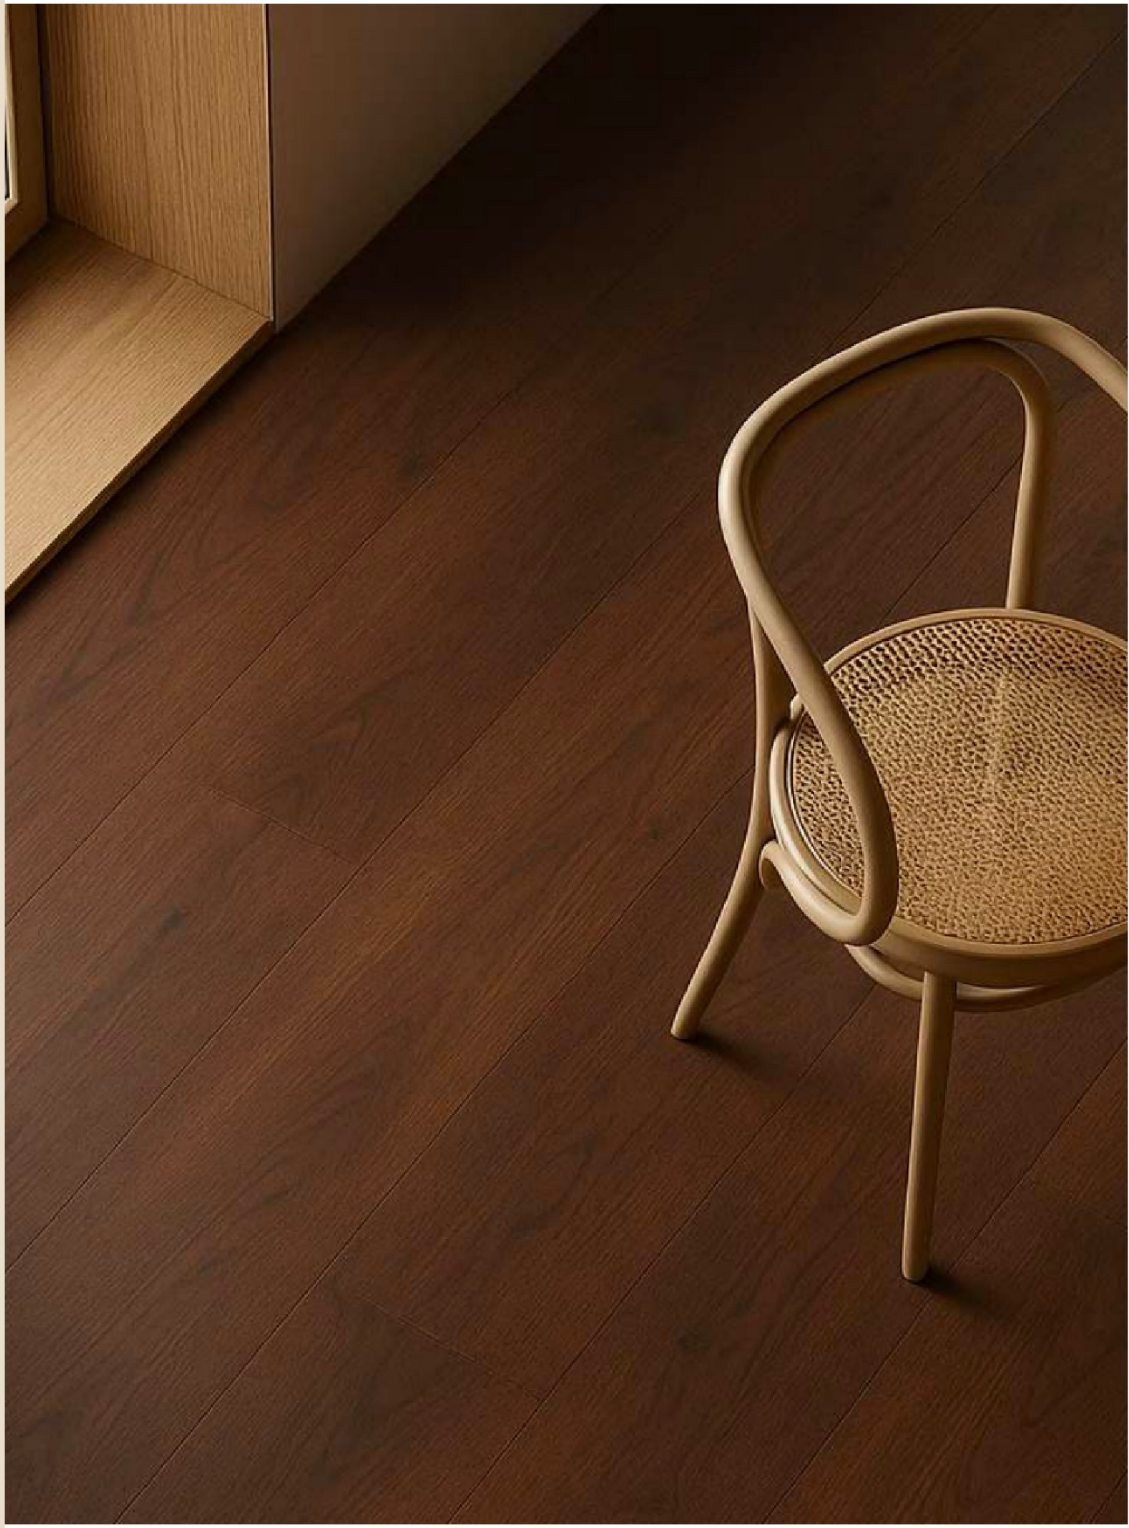
Engineered flooring with nature at its core

At Su-Vana , we redefine the essence of wooden innovation and craftsmanship. Our engineered wooden floors combine the timeless beauty of hardwood with advanced stability and durability — elegant and resilient even in changing conditions.

You're not just choosing a floor — you're investing in the foundation of timeless sophistication.

Why choose Su-Vana Engineered wood flooring?

- Click Locking
- 6–6.4 ft Long Planks
- Stained
- Brushed
- Matt Lacquer
- Real Wood
- Bevelled Edge



ENGINEERED WITH PURPOSE

The strength within every plank

Engineered wood captures the timeless appeal of hardwood while offering the strength modern living demands. Unlike solid wood, it stays stable across a wide range of environments.

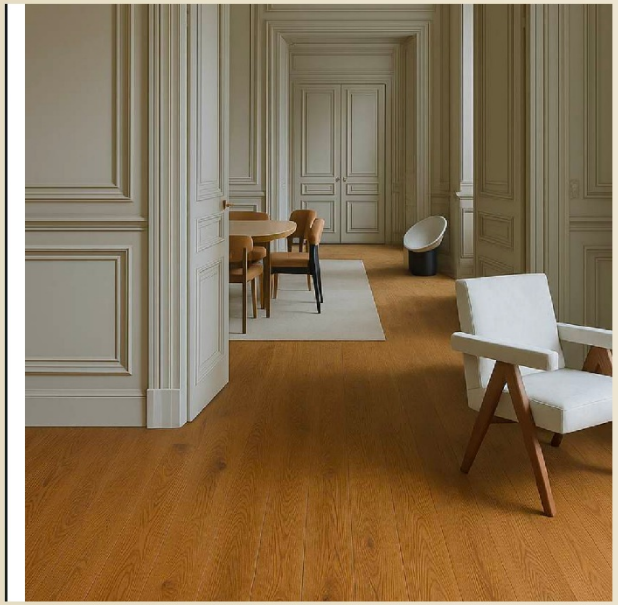
01 **Real hardwood top layer** — the authentic surface, grain and warmth.

02 **Stabilising core** — cross-grain bonded against warping and shrinking.

03 **Balancing base** — holding integrity through seasonal change.

THE COLLECTIONS

Three ways to lay a floor



I

THE FINISHING TOUCH

Matching accessories

Every Su-Vana floor is completed by skirting and transition profiles finished in the same shade and grain — a seamless detail from wall to threshold.

Skirting Boards

Engineered skirting that frames every room in the exact shade and grain of the floor — a continuous, tailored finish where wall meets ground.

Transition Profiles

T-profiles, reducers and end-caps for flawless joins between rooms and floor levels — colour-matched to disappear into the surface.
